Do you or your child have a lazy or turned eye?

Child: Right eye turned outward (Divergent Strabismus)  Child: Right eye turned inward (Convergent Strabismus)

Will you help Dr. Chandna and his team’s Research Study by giving us some of your valuable time?

Adult: Left eye turned outward (Divergent Strabismus)  Glasses worn for lazy eye (Amblyopia)

This study involves

• non-invasive measurements of visual function
• 1 - 2 sessions, possible same day with rest periods
• each session 2 hours
• $20 per hour compensation for your time
• travel and parking expenses (maximum $30.00)
• at Smith-Kettlewell Eye Research Institute, 2318 Fillmore Street, San Francisco, 94115

Thank you for your time and help.
Arvind Chandna, M.D.
Senior Clinician Scientist / Ophthalmologist
