Co-investigator, National Institutes of Health (NCI), “Tubedown, Role in Angiogenesis,” EY004756 1999-2003, completed.

Investigator, National Institutes of Health: Stop-ROP EY09886 Certificate #3509 (Member), 1996-1998.

NIH: Neonatal Research Network 2 U10HD278: NICHD 4-1-96 - 3-3101 Vitamin A supplement/ROP study: William V Good Principle Investigator 1997.

Co-investigator on P20 "Cocaine Project" 1P20NS32553 - Donna Ferriero, Principal Investigator, University of California, San Francisco: 1996

### **SERVICE TO THE NATIONAL INSTITUTES OF HEALTH**

Chair, special emphasis panels; reviewer for various panels at the NEI on roughly a yearly basis, 2002-present. National Eye Institute

Center for Alternative Medicine reviewer: October 25, 2004

Member, Data and safety monitoring committee, for the Convergence insufficiency treatment trial funded by the National Eye Institute: 2005-present

Co-Chair, long term planning committee on low vision and blindness research, 2011

Audacious Goals Consultant to National Eye Institute 2013

### **RESEARCH ACTIVITIES**

1. Development of quantitative tools to measure vision in amblyopia and visually impaired children
2. Clinical interventions in strabismus and amblyopia
3. Rehabilitation for visually impaired children
4. Retinopathy of prematurity: U-10 grant to study early treatment for retinopathy of prematurity
5. Studying the effects of cocaine and tobacco smoke exposure during gestation on the developing visual system in babies.
6. Tubedown-1, a novel acetyltransferase controlling retinal endothelial cell maturation and its role in macular degeneration
7. Melatonin for disordered sleep rhythm in blind children.
8. Spatial interactions in infantile autism and Asperger syndrome: measures of middlevision
9. Visual development in premature infants
10. Visual Development in Infants with Neonatal Jaundice
11. B-blockers for retinopathy of prematurity
