

## **Blindness and Low Vision Support Group: April 15, 2026**

---

### **Peer Discussion: Share and Grow your Blindness and Low Vision Toolbox (Hybrid)**

---

#### **This April Meeting:**

This month's meeting is an open peer discussion — there is no formal presentation, no set agenda, and no expectation about how much you share.

The conversation will be shaped by the group itself. Come ready to share your experiences, ask questions, offer insights, or simply listen. Whether you are newly navigating vision loss or have years of experience, you are welcome here, wherever you are in your journey.

Time: 3:30 PM to 5:00 PM (PST)

Date: Wednesday, April 15, 2026

Format: In-person at 2318 Fillmore Street, San Francisco, CA 94115

(If you can't attend in person, there is a zoom link to follow along virtually)

---

## Help your experience reach further (State of the Science Meeting)

At this session, we will also be collecting short vignettes from participants. These are 100% voluntary and opting out has no impact on your participation in the group.

A vignette can be anything: a quick story, a reflection, a challenge you have faced, a question you keep coming back to, or a tool or strategy that has made a difference for you. These vignettes are an opportunity for your lived experience or questions, concerns, and insights to directly inform researchers and help shape what gets studied and prioritized in the blindness and low vision field.

If you would like to provide a vignette, you can get started by clicking the button below to begin the media release form. We will also set aside time during this meeting to complete them together.
