

Blindness and Low Vision Support Group December 17, 2025 (Hybrid)

Date: Wednesday, December 17, 2025

Time: 3:30 PM - 5:00 PM PST

Location: 2318 Fillmore Street, San Francisco, 94115

This is an in-person meeting with an optional Zoom link to join virtually.

ZOOM

Our speaker: John Taylor, Product Specialist

John Taylor specializes in Braille and low vision technology for users across Northern California. He joined Sterling Adaptives in 2019 and brings over a decade of experience in the assistive technology field. His background includes national training roles at ViewPlus Technologies and Irie-AT, where he focused on braille embossers, tactile graphics, and low vision products.

What We Will Cover

John will begin by introducing Sterling Adaptives, their mission, and how their specialists support individuals with vision loss. He will walk us through a variety of adaptive technology devices and software, explaining the benefits of each and how they can meet specific needs in daily life.

Participants will have the opportunity to:

- Learn about available low-vision and Braille technologies
- See demonstrations of devices and software
- Explore tools through hands-on time
- Ask questions and receive clear, personalized guidance
- Understand how adaptive technology can support independence and continued engagement in meaningful activities

Our hope for this session is to help community members discover tools that can make daily tasks easier, expand independence, and support the activities they love.
